11.

- 1. The Source of the information contained in this IR is the chief chemist for an Austrian POL firm. The firm's president is the Austrian go-between on all POL matters dealing with the Soviet Trade Commission, VIENNA, Austria. The Austrian firm, on many occasions during the past year, has been utilized as a middle man by the Soviet/Satellite nations to conduct various trade dealings. The information in this report was gluaned from a letter of inquiry, dated 9 March 1957, directed to the Hooker Electro-Chemical Company, Miagara Falls, New York.
- 2. The Soviet Trade Commission, VIEHNA, Austria, was directed to secure a source of supply of fluorolubes. The Trade Commission requested their Austrian go-between to find and to purchase up to 200 tons of fluorolubes. Fluorolubes are lubricants which are thermally stable up to 300°C and are not effected by concentrated soids and/or oxidising agents. The Trade Commission informed the Austrian firm that these lubricants are necessary and urgently needed to carry out experiments in the Soviet Union.
- 5. The Austrian firm has sent a letter of inquiry to the Hooker Electro-Chemical Company, Riagara Falls, New York, dated 9 March 1957.
- 4. The Source of this information is a tested Source and such of his information, in the past, has been proven accurate by cross-checking. If this deal on fluorelubes goes thru between the Austrian and US firm, the lubricants will most certainly end up in the support of some Soviet research and development program.

BITE THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, BU U.S.C.—
HI AND IE. AS AMENDED. HIS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MAINER TO AN UNAUTHORIZED PRISON IS PROMINED BY LEW,
